

BID BULLETIN NO. 1
01 JULY 2026
Public Bidding No. VMC-2026-057
SUPPLY AND DELIVERY OF VARIOUS LABORATORY SUPPLIES AND REAGENTS
FOR MICROBIOLOGY AND BLOOD BANK SECTION (2ND SEMESTER OF CY 2026)

Issued pursuant to Sec. 51.5 of the IRR of RA 12009 to clarify and/or amend certain provisions in the Bidding Documents issued for this project, considering the issues raised and clarifications made by the prospective bidders during the Pre-bid Conference held on July 1, 2026, likewise, respond to bidder's written queries received within the prescriptive period for filing.

Item No.	Posted in Bidding Documents	Item No.	Amendment
3	<u>Evacuated Tube - EDTA, K2, 100's, 2 ml</u> (Specification: 1) sterile 2) Each tube is clearly labeled indicating: additive content, approximate blood draw, indicator, expiration and lot #, whether tube interior is sterile or non-sterile and field for patient name, age and ward 3) Safety - with safety closure that eliminates the risk of contact with blood left on stopper, easy and efficient re-insertion of the closure, closure does not pop-out when returning cap (when transferring blood from syringe) 4) Tube made of plastic, precisely controlled vacuum, ease of penetration (to rubber stopper) 5) can stand centrifugation for 10mins at 3500rpm 6) Sealed properly using the descaler of TLA 7) must be compatible with the existing analyzers of Clinical Chemistry and Hematology)	3	<u>Evacuated Tube - EDTA, K2, 100's, 2 ml</u> (Specification: 1) sterile 2) Each tube is clearly labeled indicating: additive content, approximate blood draw, indicator, expiration and lot #, whether tube interior is sterile or non-sterile and field for patient identifier 3) Safety - with safety closure that eliminates the risk of contact with blood left on stopper, easy and efficient re-insertion of the closure, closure does not pop-out when returning cap (when transferring blood from syringe) 4) Tube made of plastic, precisely controlled vacuum, ease of penetration (to rubber stopper) 5) can stand centrifugation for 10mins at 3500rpm 6) Sealed properly using the descaler of TLA 7) must be compatible with the existing analyzers of Clinical Chemistry and Hematology)
6	<u>Needle, multisample, flash back blood collection</u> , Specification : 100's/box, sterile, gauge 21, multiple sample draw, transparent/clear hub, with 1 adaptor per box.	6	<u>Needle with disposable adaptor, multisample, flash back blood collection</u> , Specification : 100's/box, sterile, gauge 21, multiple sample draw, transparent/clear hub.
	ATCC		American Type Culture Collection (ATCC)
72	Fully-automated system for Blood Culture, - Reagent free use of machine, includes analyzers and computer with peripherals, printer; - Result printout customizable to end-user's format; - Can generate printout of summary of reports run daily as specified by end-user; - LIS ready and the winning bidder should shoulder any expenses related to LIS connectivity. LOT BID for item no. 72	72	Fully-automated system for Blood Culture, - Reagent free use of machine, includes analyzers and computer with peripherals, printer; - Result printout customizable to end-user's format; - Can generate printout of summary of reports run daily as specified by end-user; - LIS ready and the winning bidder should shoulder any expenses related to LIS connectivity. - with a capacity of at least 200-240 bottles LOT BID for item no. 72
78	Reagent free use of machine :Automated Blood Collection System (APHERESIS Machine) - Capable of multi-component collection of platelets, red cells, plasma and all combinations of blood components and can be used for patient treatment such as therapeutic plasma exchange, stem cell collection,	78	Reagent free use of machine :Automated Blood Collection System (APHERESIS Machine) - Capable of multi-component collection of platelets, red cells, plasma and all combinations of blood components - Equipment must be intermittent flow or continous flow - Full-automated donor collection protocols

Item No.	Posted in Bidding Documents	Item No.	Amendment
	autologous RBC collection and therapeutic cell removal - Equipment must be intermittent flow to allow automated draw/return speed adjustment to each donor's/patient's unique flow capabilities - Full-automated donor collection protocols - Must be mobile and portable,the apheresis machine must be equipped with hard transport carrying case - Transport case must be sturdy - Automated programming of collection parameters such as target yield, target number of cycles, target duration of procedure and target volume of blood to process - With interactive help screens and user-friendly interface for simple operation of equipment: 1. Shall continuously provide and replenish consumables ; 2. Shall assure replacement of unused reagents and consumables (delivered within six months of expiration date) before expiration and will provide a guarantee letter of replacement; 3. Shall replace reagents and consumables with three-months remaining shelf life before the expiration date; LOT BID # 78		- Must be mobile and portable,the apheresis machine must be equipped with hard transport carrying case - Automated programming of collection parameters such as target yield, target number of cycles (if applicable), target duration of procedure and target volume of blood to process - With interactive help screens and user-friendly interface for simple operation of equipment: 1. Shall continuously provide and replenish consumables ; 2. Shall assure replacement of unused reagents and consumables (delivered within six months of expiration date) before expiration and will provide a guarantee letter of replacement; 3. Shall replace reagents and consumables with three-months remaining shelf life before the expiration date; LOT BID # 78

All other provisions of the bidding documents not affected by revisions included in this Bid Bulletin shall remain in effect. Amendments/inclusions/clarifications made herein shall be considered an integral part of the Bidding Documents.
